

TASK 1: Writing Better Prompts

Productivity Apps

Vague Output: The response is generic, opinion-based, and unfocused. It gives surface-level descriptions without clear comparison or recommendation.

Improved Output: The response is structured, compares features clearly, and gives a justified recommendation.

Why Better: The improved prompt defines audience, comparison criteria, and output format, leading to clarity and usefulness.

Learning a New Language

Vague Output: The answer mixes random advice without timeline or progression.

Improved Output: The output follows a 3-month plan with weekly structure and milestones.

Why Better: Specific goals and structure force actionable guidance instead of generic tips.

Buying a Laptop

Vague Output: The output is broad and brand-agnostic, lacking decision clarity.

Improved Output: The response gives budget-aware specifications and avoids unnecessary details.

Why Better: Constraints like budget and use-case guide the model to give precise recommendations.

Reading Habit

Vague Output: Advice is motivational but inconsistent and unmeasurable.

Improved Output: The response provides a 30-day habit-building plan with tracking methods.

Why Better: Time-bound structure improves practicality and follow-through.

Social Media Usage

Vague Output: The response is empathetic but lacks actionable reduction strategy.

Improved Output: The output delivers a step-by-step reduction plan with metrics.

Why Better: Measurable targets transform advice into execution.

Improving Focus

Vague Output: The output repeats common advice without systemization.

Improved Output: The response provides a complete focus framework with evaluation metrics.

Why Better: Defined study duration and structure eliminate ambiguity.
